

MISSION

TROKAMED – a family-owned company in supporting doctors and patients.

As a profitable, medium-sized, family-owned company, we are positioned in the field of minimally invasive surgery. With outstanding manufacturing expertise, combined with user knowledge, we develop customised “Made in Germany” solutions for our customers.

We manufacture high-tech instruments and equipment. Our products are distributed internationally in cooperation with our partners under their own brand names, or by specialized dealers, the products are often marked with “Made by TROKAMED”.

TROKAMED – a partner in precision engineering.

Our core competence is tube machining and mounting the assembly. We are the competent partner for technical customers in the sector of sensor technology.

TROKAMED – a family-owned company for our employees.

Our flat hierarchy allows our employees to continuously develop their skills. This contributes to the success of the company.

Our maxim is: innovation & precision for a better and longer life.

MISSION STATEMENT

TROKAMED focuses in the medical sector on endoscopic procedures such as gynaecology, urology, laparoscopy and arthroscopy. As for precision engineering sector, we focus on the core competences of tube machining and mounting the assembly.

We take the responsibility in the long term that our products remain safe and reliable for patients, users and customers. The high quality of our products is the basis for the development of our company.

In close cooperation with our customers as well as doctors and surgeons, we constantly expedite the development of our instruments and equipment. Our products are competitive to market leaders.

We manufacture our products with German efficiency. This allows us to act effectively worldwide. Within the context of globalisation, we tap into the global markets in cooperation with our customers. We are committed to fair competition.

As a family-owned company, values such as trust and responsibility, but also commitment, respect and performance-based remuneration, are of key importance to us. Our team monitors compliance with the corporate policies autonomously. It goes without saying that our products and our production processes comply with all current environmental guidelines.

To support doctors, patients and customers, we are ready to satisfy the daily requirements and wishes of our customers. According to our maxim: innovation & precision for a better and longer life.
